

# 20 GHz Photodiode, High Input Power to 100 mW

**SK-PD-20-HP-M**

The Optilab SK-PD-20-HP-M is a 20 GHz highly linear photodiode module designed for RF over Fiber, antenna remoting, and broadband RF transmission applications using optical fiber. It can accept optical input power levels of up to 100 mW and keep linear operation to 50 mW input level. With high input power, SK-PD-20-HP-M can be used to replace TIA-based photoreceiver. This compact, cost-effective receiver module can provide users with status monitoring through a USB 2.0 port. When the SK-PD-20-HP-M RF over fiber receiver module is linked with the LTA series of transmitter modules, the combination provides an excellent solution for wideband RF to fiber conversion applications, go to [optilab.com](http://optilab.com) for more information.
